

## Material Specification Sheet

### **ECWATTLE** Excelsior Wattles

**Description:**

The ECWATTLES are cylindrical devices made with excelsior compressed inside polyethylene netting. The ends are twisted closed. They are coiled, bound and palletized for easy transportation. Each pallet is shrink-wrapped and labeled.

The ECWATTLES are designed to be used as slope interceptor devices, check dams, around temporary stockpiles, at curb cuts and drain inlets. They are secured with wooden stakes and should be installed in accordance to East Coast Erosion Blankets, LLC's Wattle Installation Guidelines.

The ECWATTLES have been tested by an independent laboratory to have 83% filtering efficiency.

**Materials:**

**Netting**

Polyethylene

**Matrix**

100% Weed-free  
Aspen Excelsior  
Minimum 80% is 4" length

**Standard Sizes:**

Diameter:	<b>20.0 in</b>
Length:	10.0 ft
Weight $\pm 10\%$ :	50.0 lbs
<i>Custom lengths available upon request</i>
