EAST COAST EROSION BLANKETS: EDGE TO EDGE COVERAGE

MEGA ROLL

BERNVILLE, PA, SEPTEMBER 11, 2006: East Coast Erosion Blankets, LLC, a leading manufacturer of erosion control blankets, has recently expanded manufacturing capabilities to include new 15'0" wide blankets called Mega Rolls.

"We are constantly developing and producing new products enforcing our total commitment to meet our customer and industry's demands." stated Diane Hitt, General Manager. "East Coast Erosion Blankets is committed to providing quick, consistent delivery and outstanding customer service in addition to a superior product."

These 15'0" Mega rolls are manufactured in customers' choice of straw or excelsior fiber, and are available in custom lengths. By utilizing the wider width, users can eliminate seams and will require less overlapping, thus saving on labor and costs.

East Coast Erosion Blankets has production facilities located in Pennsylvania and South Carolina. ECEB currently manufactures over 14 different types of erosion control products including short term, long term, permanent reinforcement mats, wattles and mega rolls. For more information on East Coast Erosion Blankets call 1-800-582-4005 or visit www.erosionblankets.com
